

Rechcel Toledo

Software Developer - [phcodesage](#)

Davao, Philippines
rechceltoledo@gmail.com
github.com/phcodesage
phcodesage.github.io

Product-minded software developer building polished web products, real-time systems, open-source tools, and on-chain experiments. Available for contract, freelance, and select product work.

PRACTICE

Product frontend

React, Next.js, responsive interfaces, interaction design

Backend and APIs

Python, Flask, integrations, testing, maintainability

Real-time systems

WebRTC, WebSockets, presence, chat, video calls

Developer tools

Rust, agent workflows, MCP servers, Jinja UI components

Web3

Wallets, RPC, Solana-compatible applications, on-chain UX

SELECTED WORK

Cookie Checkpoint

Verifiable daily check-ins on Cookie Chain.

Sage Cinema

Movie discovery and playback experience.

Jinjalume

Server-rendered UI components for Flask and Jinja.

IssueAnvil

Deterministic GitHub housekeeping CLI.

EXPERIENCE

Aug 2023 - Present

Software Developer - Onlinejobs.ph

Developing a real-time communication system with Flask, WebRTC, WebSockets, messaging, voice and video calls, and user presence management.

Jun - Aug 2023

Web Development Instructor - Udemy

Created and taught practical front-end and back-end web development courses with project-based materials.

Mar - May 2023

Junior Frontend Developer - Purple Roof

Implemented and maintained user-facing features for a mortgage services platform.

Dec 2022 - Mar 2023

Backend Python Developer - Rooche Digital

Developed and maintained ecommerce APIs with a focus on integrations, scalability, performance, and clean collaboration.

OPEN SOURCE AND COMMUNITY

Public work

CodeSage Orchestrator

Drop-in multi-agent setup for OpenAI Codex with bounded scout, builder, verifier, scholar, and critic roles.

Contribution

Causify Helpers

Python AST-based private-function linter contribution with tests and actionable diagnostics.
